

ascolour. | OUR COLOURS

Our range has more than 100 colours and is ever expanding. This colour chart provides approximate examples of the solid colours; providing equivalent Pantone colour names (Pantone® Matching System, PMS colours) for your reference.

Some colours can't be accurately reproduced because of the unique characteristics of certain fabrics; when possible, please refer to an actual garment or to a physical Pantone® swatch card for the most accurate representation of the colour.

For a range of products available in one of the below colours, please visit our Colour Range page online.
